

# FY22 Outcomes Indicator Report

---

MARCH 2023

# CANS Performance

The map visualizes results for the FY 2022 cohort across the three CANS domains addressed in this report: School, Child Behavioral/Emotional Needs, and Child Strengths.

Map of Virginia Localities:

Count of CANS Domains where Percent Improved (FY2022 Cohort) Met or Exceeded Statewide

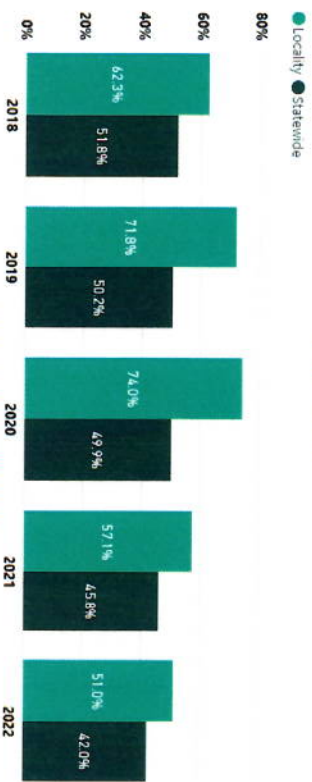

Map created using *Datavrapper*

# Hanover CANS

## CANS School

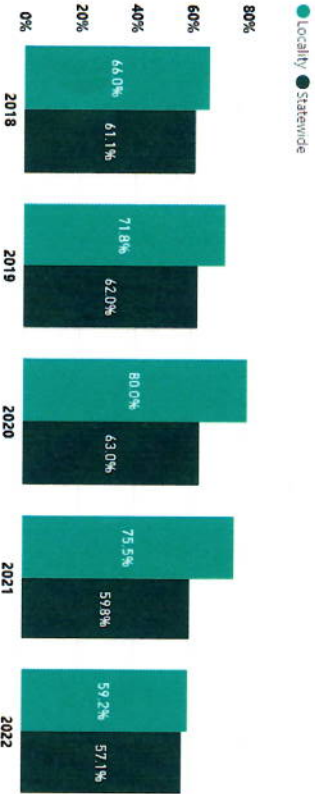

## CANS Behavioral/Emotional Needs

## Cohort - FY of Earliest Initial CANS

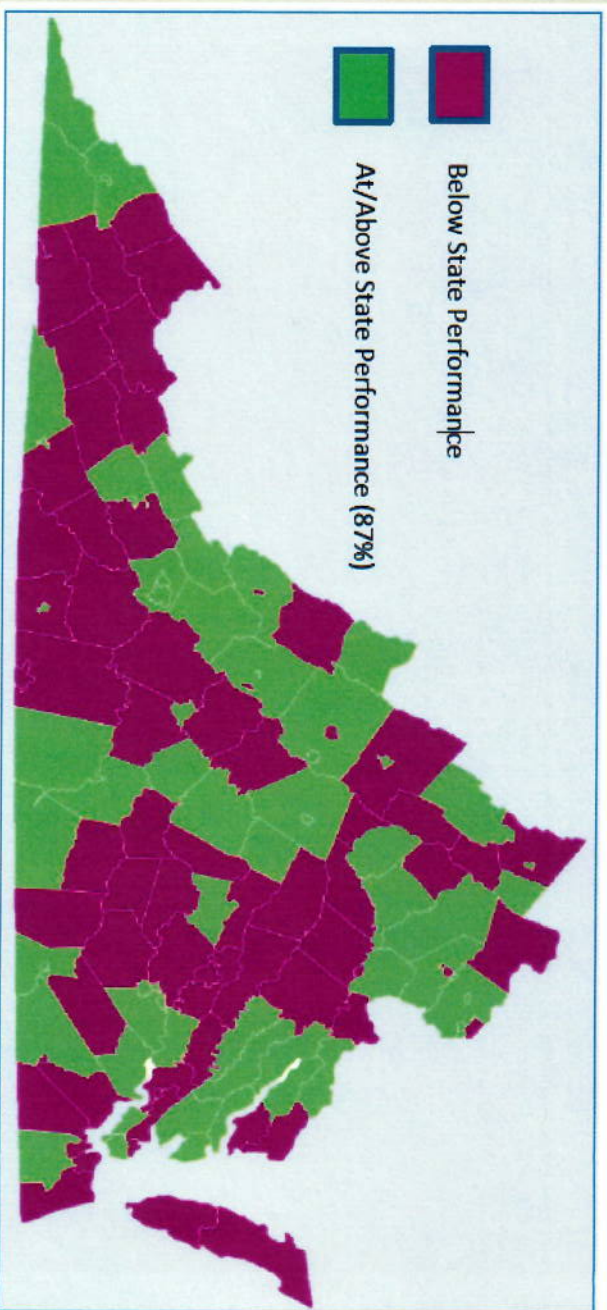

### CANS Strengths

## Community- Based Services Only

The map visualizes performance in using only community-based services.

A locality's shading represents whether its percentage of youth receiving only community-based services through CSA funding and no congregated care was at least as high as the statewide percentage for FY 2022 (87 percent) or lower.

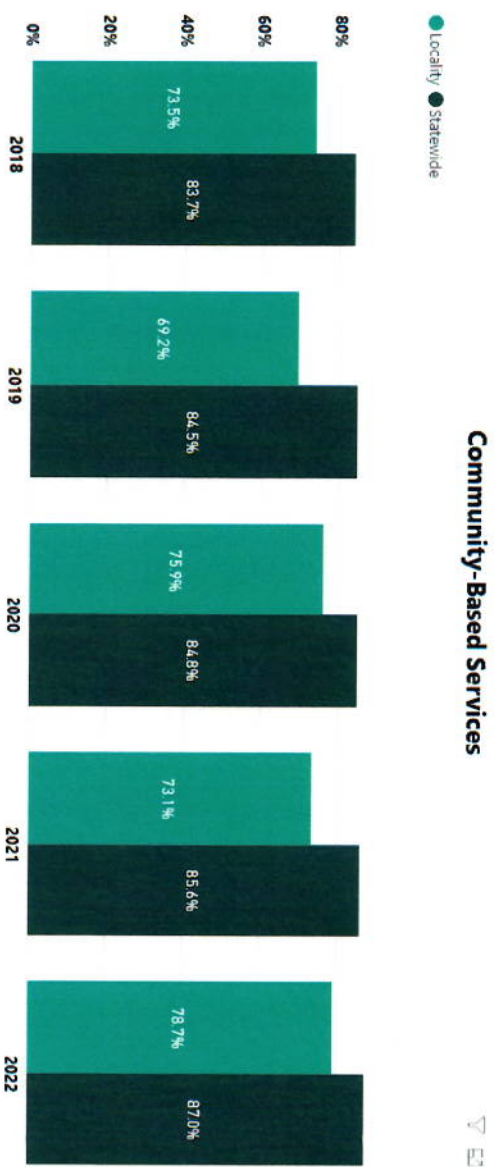

# Hanover Community- Based Services Only

Hanover 78.7%

VS

State 87%

Source: LEDRS submissions; percent of youth with **no** CSA payments for congregate care/residential services (SPT 14 through SPT 18), among all youth receiving CSA-funded services in the year

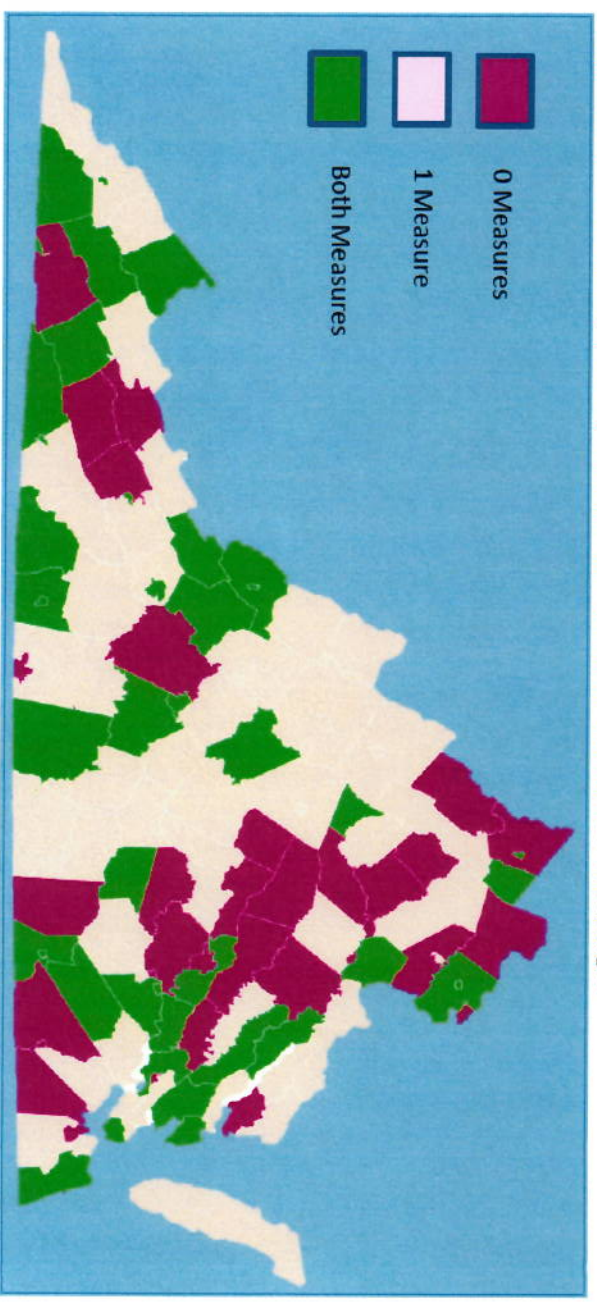

# DSS Performance

The map visualizes FY 2022 performance in Virginia DSS outcome measures:

- percentage of youth in foster care in family-based placements
- percentage of youth in foster care that exit to permanency.

A locality is shaded based on the number of measures, out of two, in which its percentage of DSS youth in foster care met or exceeded the statewide performance on each measure.
